Letter of support for A-Culture Holding Pty Ltd

I am writing in support of the OZRAS System that A-Culture Holding has been developing for onland oyster farming.

SEAPA is a leading global supplier of innovative shellfish aquaculture systems. SEAPA has close working partnerships with oyster farmers around the world which seek to improve the quality and efficiency of their aquaculture practices. SEAPA's international network of four offices enables us to work directly with farmers in over 12 countries. This access gives SEAPA a deep understanding of international best practice in oyster aquaculture.

Through more than 20 years experience, SEAPA has been aware of the multiple variables faced by the ocean environment which can bring multiple challenges for Aquaculture. From global warming influences, variables in salinity, disease, invasive species, ocean acidification, and weather, we see that a controlled RAS system can be a possible solution.

SEAPA and A-Culture Holding have a Memorandum of Understanding in place to support its commitment to enlarge and broaden existing cooperation as well as to establish new collaborations in the development of the design of a RAS system for oysters. SEAPA looks forward to its continued association with A-Culture Holding and is excited for the potential opportunities the project can bring for SEAPA, the State and Australia.

Kind regards
